~ the Line that "Rounds  
Out" the Appeal

EVERY retailer who hopes to meet the demands of all classes of trade is called upon to handle more than one grade of aluminum ware.

But it is just as important to the foresighted merchant that his low-priced aluminum be *good* aluminum as it is that his quality ware be the very best of its kind. "Price" customers who get their money's worth and a little bit more are apt to turn into profitable repeat customers for all that the merchant has to sell.

To insure to jobbers, to retailers, and to consumers the best possible money's worth in low-cost aluminum, the Aluminum Goods Manufacturing Company gives special attention to its **COMET** Aluminum ware—the line that "rounds out" the line.

This Company's unequaled facilities for economical large-scale production make it possible to incorporate in this line features of quality that are exceptional and that offer unusual value to the purchaser.

Workmanship, finish, and appearance are very good. Sizes are always full sizes. There are no misleading "trade capacities."

The **COMET** Aluminum line, as will appear from the following pages, is very complete. It is in all ways the most satisfactory line of low-cost aluminum on the market.
